VK-600

Power Amplifier

Balanced Audio Technology is pleased to introduce its new flagship for two-channel solid-state amplification in the stunning VK-600 power amplifier. With its powerful yet graceful industrial design, the VK-600 power amplifier becomes a perfect complement to Balanced Audio Technology's universally praised lineup of preamplifiers, including BAT's flagship VK-51SE.

For the ultimate in flexibility, the VK-600 can be ordered as either a stereo amplifier or monoblock VK-600M version. To continue BAT's reputation for providing an immense level of energy storage to easily meet the demands of the most complex music playback, the innovative **BAT-PAK** option remains available. Moreover, the VK-600 is also available in *Special Edition* versions as both the VK-600 SE and VK-600M SE. The special edition version of the VK-600 incorporates knowledge gained during the design of the VK-31SE and VK-51SE line-stage preamplifiers as well as the VK-P10SE SUPER-PAK. Indeed, for anyone who has marveled at the massive Depth Charge style oil capacitors used in the VK-P10SE SUPER-PAK, the VK-600 SE and VK-600M SE SUPER-PAK is simply breathtaking to behold! A full length double array of Depth Charge style oil capacitors commands your attention and provides a liquidity and ease in music playback that is as effortless as a live performance.

The elegant signal path follows the Balanced Audio Technology purist approach of using zero negative feedback to achieve the design goals of wide bandwidth and circuit linearity. Only two gain blocks are employed with each gain stage incorporating exemplary Vishay loading resistors. In addition, the VK-600 Power Amplifier offers true dual-mono performance in a single chassis by incorporating separate power cords, transformers, and circuit boards..

The massive energy storage of BAT's VK-600 solid-state flagship is mated to an innovative sequential turn-on circuit. Each channel powers up individually to reduce the power-on transient to a level that is friendly to your home. Contact your local BAT dealer or distributor for more information. All you need to do is listen.

Specifications

Output Power into 8 Ohms	300W
Output Power into 4 Ohms (Both at less than .2% THD)	600W
Frequency Response	2Hz to 250kHz
Input Impedance	100k Ω
Gain	26dB
Dimensions	19" x 9.5" x 23"
Remote Control	12V Trigger Input and Output
Weight	110lb

Features

Two Gain stages
Zero Global Feedback Design
Fully balanced Input to Output
Dual Monoblock construction
Oil Capacitor **SUPER-PAK**TM
Optional **BAT-PAK**TM
All- N-Channel MOSFET circuit
