# VK-75 & VK-150

m o n o b l o c k

THE VK-75 AND VK-150 MAKE A POWERFUL STATEMENT,

bringing sheer artistry  
to the reproduction of music.

Balanced Audio Technology

VK-75  
Power Amplifier

Balanced Audio Technology

# VK-75 & VK-150

The Balanced Audio Technology VK-75 brings new power and performance to the most advanced vacuum-tube amplifier architecture on the market. Like its predecessor, the classic VK-60, it incorporates all-triode zero-feedback topology, fully balanced operation, the ability to drive difficult loads, and true automatic biasing. Combine this heritage with greater power and a refined circuit design, and the result is an amplifier that reproduces music with sheer artistry.

Specifications

	VK-75	VK-150
<b>Number of channels:</b>	2	1
<b>Output power into 8 or 4 <math>\Omega</math> (at less than 3% THD):</b>	75 W	150 W
<b>Frequency response -3 dB:</b>	7 Hz to 80 kHz	7 Hz to 80 kHz
<b>Input impedance—each phase:</b>	200 k $\Omega$	100 k $\Omega$
<b>Input sensitivity:</b>	1 V	1 V
<b>Power supply energy storage:</b>	550 joules	550 joules
<b>Power consumption:</b>		
<b>at idle</b>	500 VA	500 VA
<b>at full power</b>	1000 VA	1000 VA
<b>Tube complement:</b>		
<b>6C33C-B</b>	4	4
<b>6SN7</b>	8	8
<b>Dimensions (W x H x D):</b>	17" x 8" x 24" (43 cm x 20 cm x 61 cm)	17" x 8" x 24" (43 cm x 20 cm x 61 cm)
<b>Weight:</b>	85 lb. (38.5 kg)	85 lb. (38.5 kg)

## MUSICAL ARTISTRY

The VK-75 offers the startlingly lifelike midrange of the best single-ended amplifiers while delivering the punch and frequency extension associated with push-pull models. Its single-ended bridge design gives the VK-75 the sound BAT amplifiers are famous for: open, free-breathing, delicate, and with effortless dynamic responsiveness. The VK-75 captures spatial information superbly, and places properly scaled, fully rounded instrumental images on a panoramic soundstage.

## COMMANDING AUTHORITY

Dynamic or hybrid speaker systems often require substantial current to achieve optimal performance. The VK-75's 6C33C-B power tube is unique in its ability to deliver high current at a relatively low plate voltage—several times more current than the popular 6550 power tube. It vastly simplifies the output transformer's task of transferring power to demanding loads. With a completely re-engineered power supply providing 75 watts per channel into 8 ohms, the VK-75 drives real-world speakers with commanding authority.

## AUTOMATIC BIAS

The VK-75 eliminates the traditional headache of tube power amplifier ownership—the constant need to adjust the bias of the output tubes. It features a sophisticated automatic circuit that performs real-time bias control of each individual output tube. Without sonic penalty, the automatic bias circuit compensates for the warm-up, aging, and variation of tubes as well as fluctuations in line voltage. Just turn the VK-75 on and enjoy the music.

## THE VK-150 MONOBLOCK

The monoblock version of the VK-75, the VK-150 supplies a prodigious 150 watts of output power. The stereo VK-75 can be fully upgraded to VK-150 monoblock status, maintaining the commitment to a rational upgrade path that has won BAT unprecedented customer loyalty. In addition, both stereo and monoblock versions can be upgraded to BAT's signature VK-75SE and VK-150SE editions, which incorporate the unequaled Russian 6H30 SuperTube in the driver stage. In any configuration, BAT tube amplification delivers world-class performance.

Visit your BAT audio specialist to experience the VK-75 and VK-150 for yourself.
